1. Introduction to Kernel for Lotus Notes to Outlook

Welcome to the user manual for **Kernel for Lotus Notes to Outlook - NSF to PST Software,** the most powerful, professional and easy to use conversion software that helps you to convert unlimited NSF files and Domino Server Mailboxes.

1.1 Using this Manual

This user manual is intended to guide users on using Kernel for Lotus Notes to Outlook. We suggest that first time users should read this user manual completely and carefully before proceeding to use the software. However, if you are an experienced user, you can use the table of contents to find out information pertaining to the tasks that you need to perform by using Kernel for Lotus Notes to Outlook.

You can use the table of contents to navigate through different sections of this user manual. The table of contents lists all the sections that are contained in this user manual in chronological order. The user manual comprises the following sections:

- Introduction
- Getting Started
- Software Interface
- Convert NSF file to PST file
- Convert Domino Server Mailboxes
- Full Version
- Support
- Troubleshooting
- Legal Notice

Certain abbreviations have been used throughout this manual. For clear understanding of the contents of this user manual, please go through the list of abbreviations, mentioned below, before reading the manual.

1.1.1 List of Abbreviations

NSF: Notes System Files

PST: Personal Storage Files

RTF: Rich Text Format

MS: Microsoft

©Lepide Software Private Limited

RAM: Random Access Memory

MB: Mega-Byte

GB: Giga-Byte

1.2 About Kernel for Lotus Notes to Outlook

Kernel for Lotus Notes to Outlook is an email migration tool for Lotus Notes email client that lets a user to easily migrate from Notes to Exchange Server. A reliable, result-oriented software with high performance percentage lets you convert your NSF files to PST files and access them with MS Outlook or directly lists in MS Exchange Server user profile. This software uses quick algorithms to convert NSF files to PST files and user mailboxes from Domino Server to Exchange Server.

Kernel for Lotus Notes to Outlook supports direct migration from Lotus Notes to Exchange Server. The software accurately converts user's emails, calendar items, address books, appointments, tasks, Sent Items, drafts, notes, alarms, journals, calendars, and every other folder and item existing in the user's Lotus Notes account. Unlimited user accounts are easy to migrate from Domino Server to MS Exchange Server using this tool. The software proves to be much helpful for both administrators and individual Lotus Notes users. Companies, organizations switching from Lotus Domino server to MS Exchange Server can be relaxed with Kernel for Lotus Notes to Outlook as the software meets every need of organizational switch.

1.3 Salient Features

Salient features of Kernel for Lotus Notes to Outlook include:

- Converts unlimited NSF files to PST files
- Enables users to convert various NSF files into PST files easily. Moreover, it enables the user to save converted NSF file into several Exchange mailboxes in a single attempt.
- Enables users to edit Lotus Notes or Outlook's folder name and migrate contents accordingly.
- Converts NSF files from Domino Server Mailbox(s).
- Supports UNICODE character conversion.
- Saves Converted File in PST or Exchange Server options.
- Provides three options to save the converted emails in three different text formats:
    - Save item(s) in TEXT/HTML format- Fastest Speed
    - Save item(s) in RTF format- Low Quality - Medium Speed
    - Save item(s) in RTF format - Best Quality - Lowest Speed
- Accurately converts emails, attachments, contacts, calendars, appointments, journals, to-do item list, sent mails, drafts, alarms, rules, group calendars, created categories, and every other folder which is created in the NSF file for a specific user account.

- Supports every version of Lotus Notes, MS Outlook, Domino Server and MS Exchange Server to perform the process of file conversion.

- Free demo version available to test the capabilities of the software before purchasing it that allows saving first 10 items of every folder existing in the NSF file.

1.4 Who Should Use this Software?

Kernel for Lotus Notes to Outlook is an excellent tool indeed for system administrators, individuals, technicians, who need to migrate from Lotus Domino Server environment to Exchange Server environment or want to convert large NSF files from Lotus Domino Server to MS Exchange Server or MS Outlook. Performing migration is a bit tedious task but with Kernel for Lotus Notes to Outlook, companies, organizations, individuals can feel relaxed.

2. Getting Started

Now that you have understood the features and potential of Kernel for Lotus Notes to Outlook, you are ready to get a hand on experience of the software. To start migrating from Notes to MS Outlook, you will first need to download and install the software.

It is strongly recommended that before installing Kernel for Lotus Notes to Outlook, you should go through the installation pre-requisites for the software to ensure that your computer is appropriately configured to run the software.

2.1 Installation Pre-requisites

The various pre-requisites for installing and running Kernel for Lotus Notes to Outlook can be broadly classified into two major categories – Hardware requirements and Software requirements.

2.1.1 Hardware Requirements:

The hardware requirements for installing the software are as follows:

- Pentium Class Processor
- Minimum 64 MB RAM (128 MB Recommended)
- 10 MB for Software installation
- Disk Space - Enough space to store the converted PST files

> You should have at-least 10 MB of free disk space if you want to save 10 MB of converted data.

2.1.2 Software Requirements:

The software requirements for installing the software are as follows:

2.1.2.1 Operating System Requirements

Supported Operating Systems:

- Windows Server 2000
- Windows Server 2003
- Windows Server 2008
- Windows Server 2008 R2
- Windows Server 2012

- Windows XP
- Windows Vista
- Windows 7
- Windows 8
- Windows 2003
- Windows 2000

2.1.2.2 Lotus Notes & Domino Server Version Requirements

Supported Lotus Notes & Domino Server versions:

- Lotus Notes 8.5, 8.0, 7.0, 6.5, 6.0
- Lotus Notes Domino Server 8.5, 8.0, 7.0, 6.5, 6.0

2.1.2.3 MS Outlook Version Requirements

Supported MS Outlook versions:

- MS Outlook 97, 98, 2000, 2002, 2003, 2007, 2010, and 2013.

2.1.2.4 MS Exchange Server Version Requirements

Supported MS Exchange Server versions:

- All versions of MS Exchange Server (Exchange Server 5.0, 5.5, 2000, 2003, 2007, 2010, 2013).

> MS Outlook and Lotus Notes should be installed on the host computer on which you are performing the conversion. Also, Lotus Notes Domino Server should be in working condition while using the Convert Domino Mailboxes feature.

2.2 Downloading Kernel for Lotus Notes to Outlook for the First Time

After checking your computer with the prescribed system requirements for Kernel for Lotus Notes to Outlook, you can download and install the software on your computer. You can buy the full version of the software from any one of our authorized resellers – Element5, Asknet and 2CO.

If you want to try using Kernel for Lotus Notes to Outlook before buying it, you can download the evaluation version from the following link:

http://www.nucleustechnologies.com/download-convert-nsf-to-pst.php

> You can save the first 10 items of every folder existing in the .NSF file to PST file format using the evaluation version of Kernel for Lotus Notes to Outlook; however, to save the entire converted items you need to purchase the Full Version.

2.3 Install Kernel for Lotus Notes to Outlook

After downloading the installer file for Kernel for Lotus Notes to Outlook, you can install the software by running the file. To install Kernel for Lotus Notes to Outlook, perform the following steps:

1. Double-click the Kernel for Lotus Notes to Outlook software installer file.
2. Follow the on-screen instructions. The **Setup Installation Completion** screen will be displayed.
3. Click **Finish** to launch the software. The main window of the software appears.

2.4 Start Kernel for Lotus Notes to Outlook

To start Kernel for Lotus Notes to Outlook software,

Click **Start** > **All Programs** > **Kernel for Lotus Notes to Outlook**

Alternatively, you can launch Kernel for Lotus Notes to Outlook by double-clicking the shortcut icon available on the desktop and Quick Launch icon.

2.5 Uninstall Kernel for Lotus Notes to Outlook

You may need to uninstall and re-install Kernel for Lotus Notes to Outlook. To uninstall Kernel for Lotus Notes to Outlook software,

1. Click **Start** > **All Programs** > **Kernel for Lotus Notes to Outlook** > **Uninstall Kernel for Lotus Notes to Outlook**

A warning message will be displayed.

2. Click **Yes** to uninstall Kernel for Lotus Notes to Outlook.

> Before proceeding to uninstall Kernel for Lotus Notes to Outlook, you must ensure that the software is not running.

You can alternatively uninstall Kernel for Lotus Notes to Outlook from the **Control Panel** by performing the following steps:

1. Click **Start** > **Control Panel** and then double-click **Add or Remove Programs** icon.
2. Select **Kernel for Lotus Notes to Outlook** and click **Remove**.

A warning message will be displayed.

3. Click **Yes** to uninstall Kernel for Lotus Notes to Outlook.

3. Software Interface

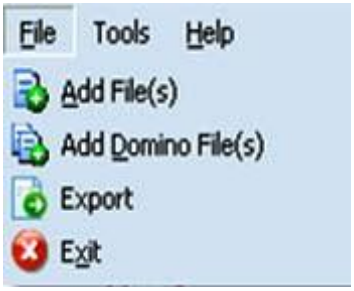
Now that Kernel for Lotus Notes to Outlook has been installed on your computer, you can start using the software after getting acquainted with the software interface.

3.1 Menu Bar

The menu bar of Kernel for Lotus Notes to Outlook comprises three main menus – File, Tools, and Help.

3.1.1 File Menu

The **File** menu of Kernel for Lotus Notes to Outlook appears as:



Menu item in the **File** menu:

Field Name	Field Description
Add File(s)	Select to add NSF file(s) for conversion
Add Domino File(s)	Select to add Domino files for conversion
Export	Select to start the conversion process from NSF files to Exchange Server or PST files or Domino Server files to Exchange Server or PST files
Exit	Select to close Kernel for Lotus Notes to Outlook software

3.1.2 Tools Menu

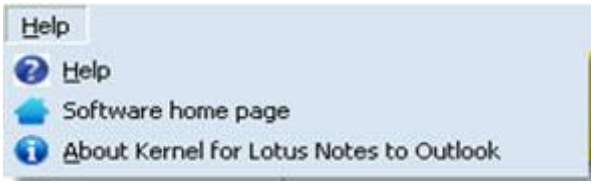
The **Tools** menu comprises one menu item.

Menu item in the **Tools** menu:

Field Name	Field Description
Advance Settings	Select this option to access 'View Folders' which are by default created by Lotus Notes. To view them, you need to activate the 'Show View Folders' option from the Advance Settings window.

3.1.3 Help Menu

The **Help** menu comprises three menu items.



Menu items in the **Help** menu:

Field Name	Field Description
Help	Select to open User Help Manual of Kernel for Lotus Notes to Outlook software
Software home page	Select to visit software homepage on our website
About Kernel For Lotus Notes to Outlook	Select to know version and support information about Kernel for Lotus Notes to Outlook software

3.2 Tool Bar

The tool bar in Kernel for Lotus Notes to Outlook software contains following buttons:

Button	Button Description
	Click to add and list .NSF file(s) for conversion
	Click to add and list Domino Server to Kernel for Lotus Notes to Outlook software for conversion

© Lepide Software Private Limited

Click to export/save selected .NSF file to .PST or Exchange Server file format

Click to remove NSF files that have been added before the Lotus Notes to Outlook conversion starts.

Click to preview NSF files that have been added before the Lotus Notes to Outlook conversion starts. Preview works only for Standard mode.

Click to view software's home page on our website.

Click to know version & support info about the software

Click to buy full version of the software

4. Using Kernel for Lotus Notes to Outlook Software

4.1 Standard Mode

4.1.1 Convert NSF files to PST files

The Standard Mode of Kernel for Lotus Notes to Outlook software allows its users performing following conversions:

1. Convert NSF files to PST files

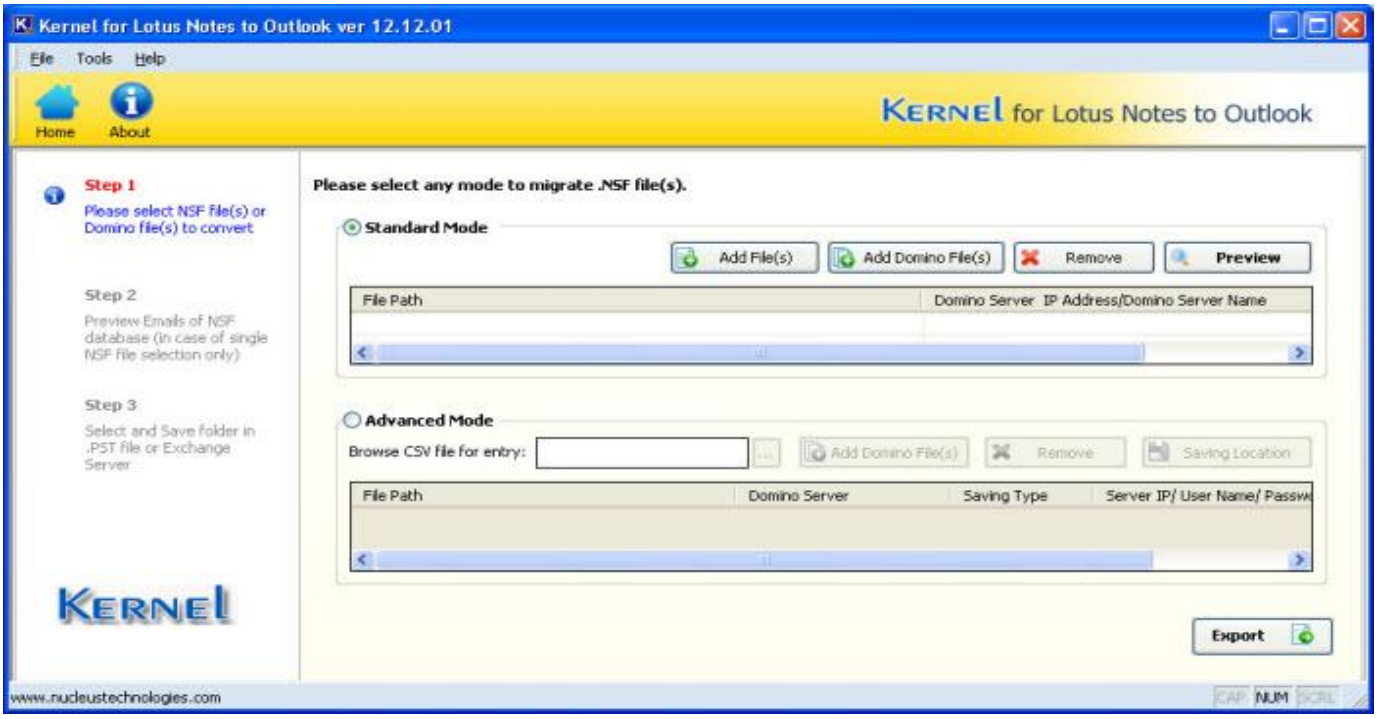
2. Convert NSF files to Exchange Server

3. Convert Domino Server files to Exchange Server

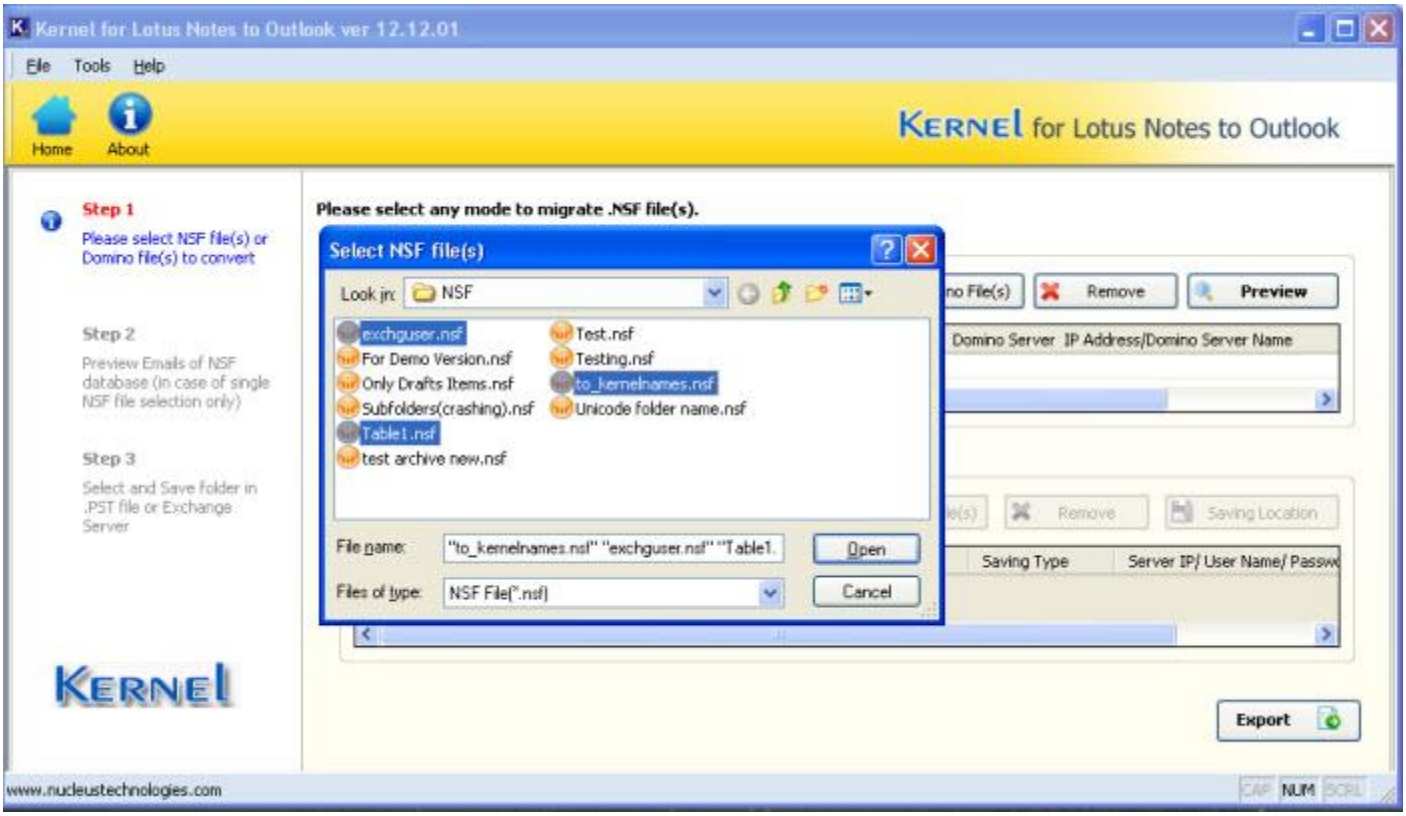
4. Convert Domino Server files to PST files

Let's see how Kernel for Lotus Notes to Outlook software performs the NSF files to PST files conversion in Standard mode:

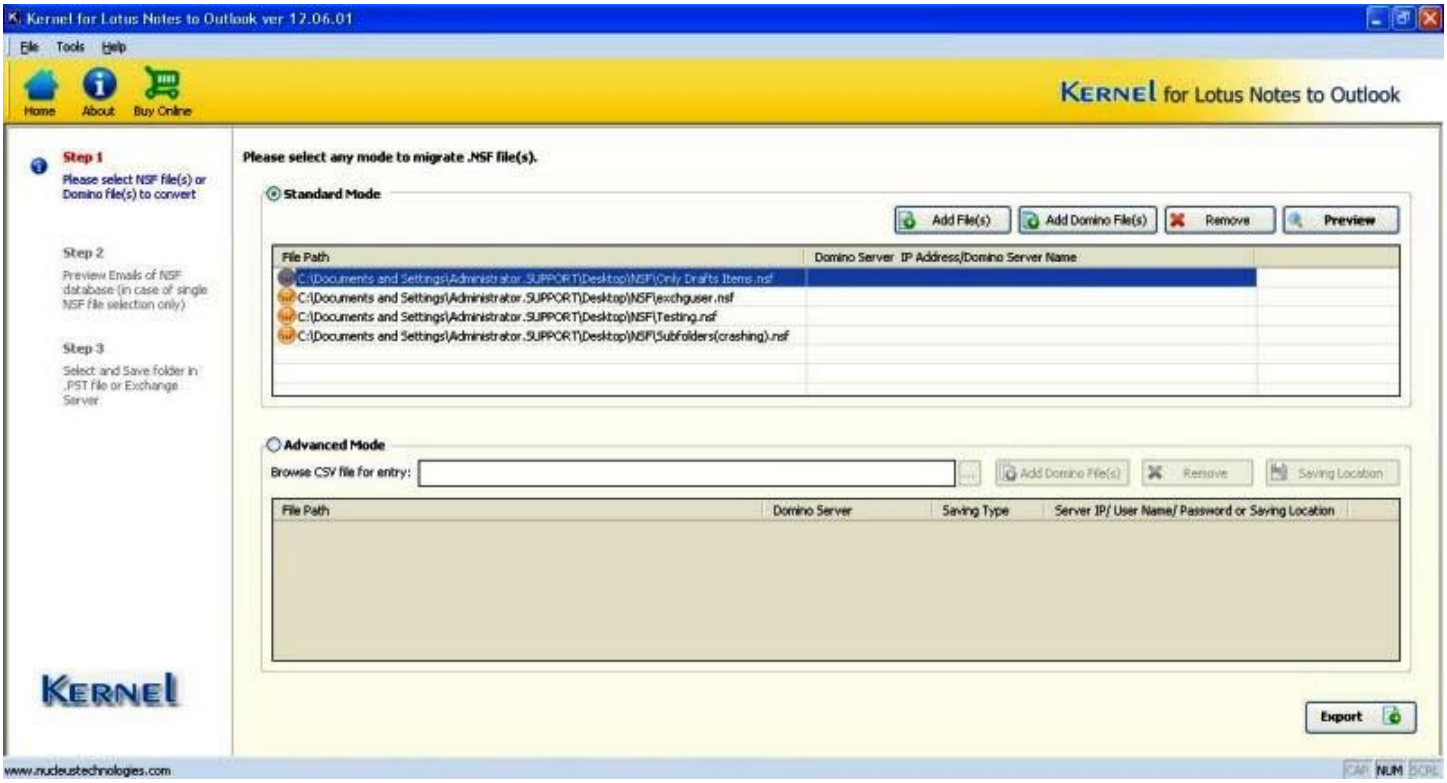
Step 1: Launch Kernel for Lotus Notes to Outlook software and Choose **Standard Mode** for NSF files to PST files conversion.



Step 2: Click the **Add File(s)** button and select any number of NSF files for conversion:



Selected NSF files will get listed in the Kernel for Lotus Notes to Outlook software for conversion.



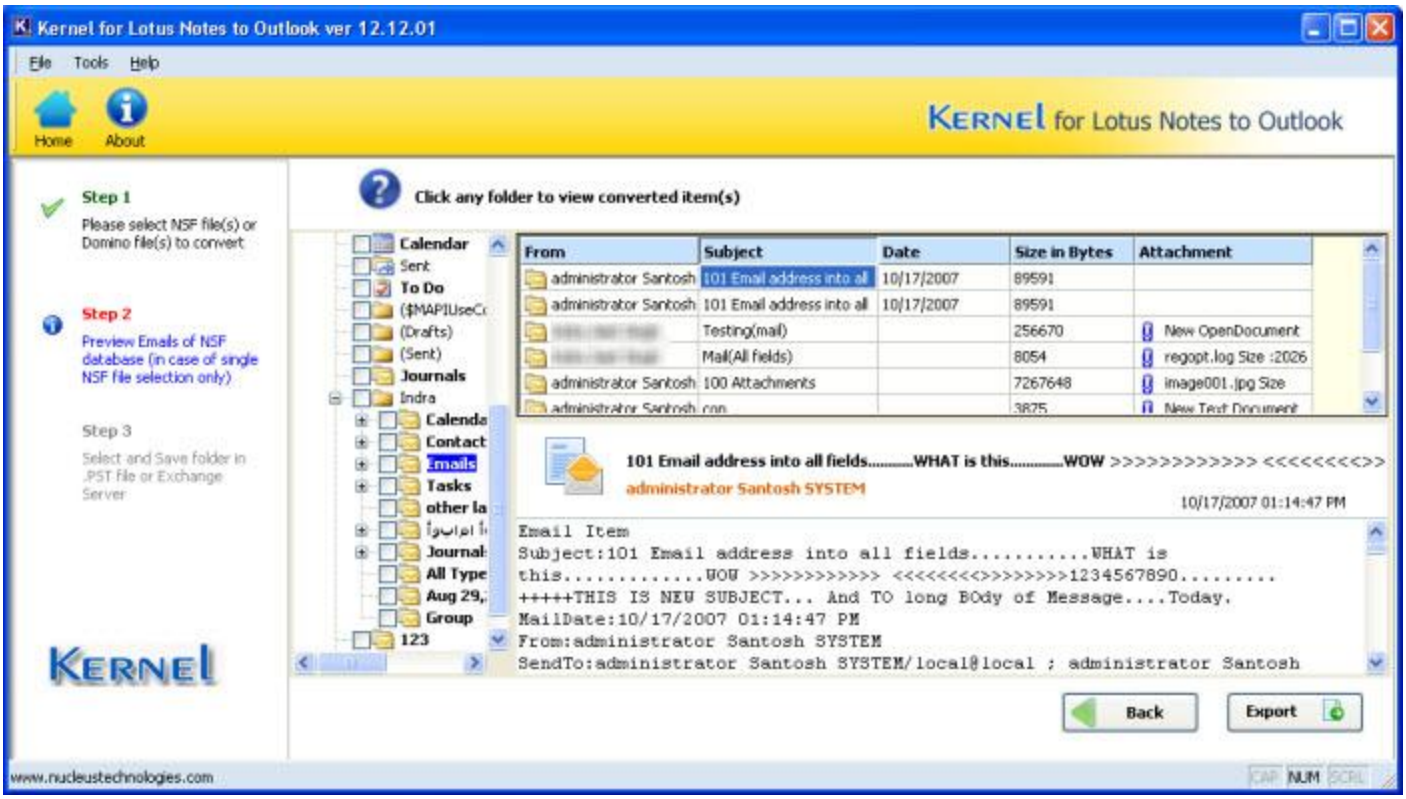
© Lepide Software Private Limited

KERNEL Notes to Outlook

Step 3: Select any NSF file and click the desired button.

> **Note:** Kernel for Lotus Notes to Outlook software facilitates you to preview the NSF file content before saving it with the help of **Preview** button.

Click the **Preview** button to preview or click the **Export** button to save the files before or after seeing the preview. Here, the **Preview** button has been clicked to view email data:



Step 4: After the preview, click on **Export** button. Following screen will be displayed:

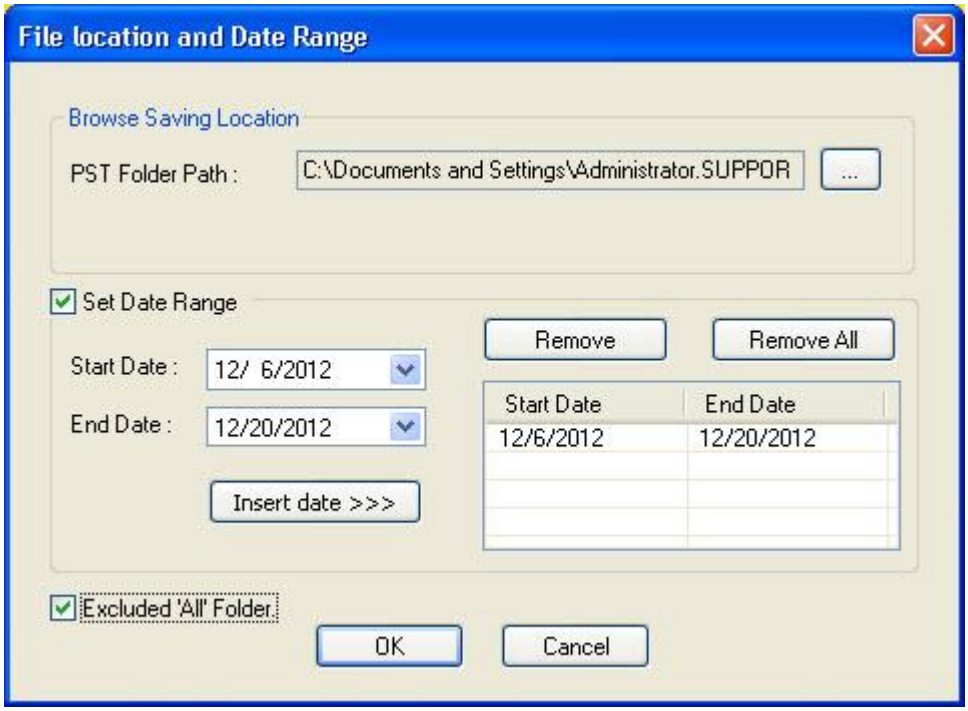
Select any one of them:

- Save in PST
- Save in Exchange Server

Choose the "**Save in PST**" Mode and Click **OK**.

© Lepide Software Private Limited

Provide the Saving Location and Date Range for the PST file:

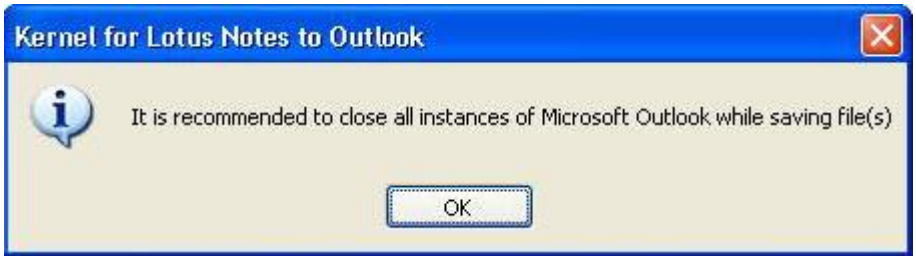


Define the PST folder path to save the converted file on your disk. Define the Date Range and insert that date range to convert NSF files from Start Date to End Date into PST File.

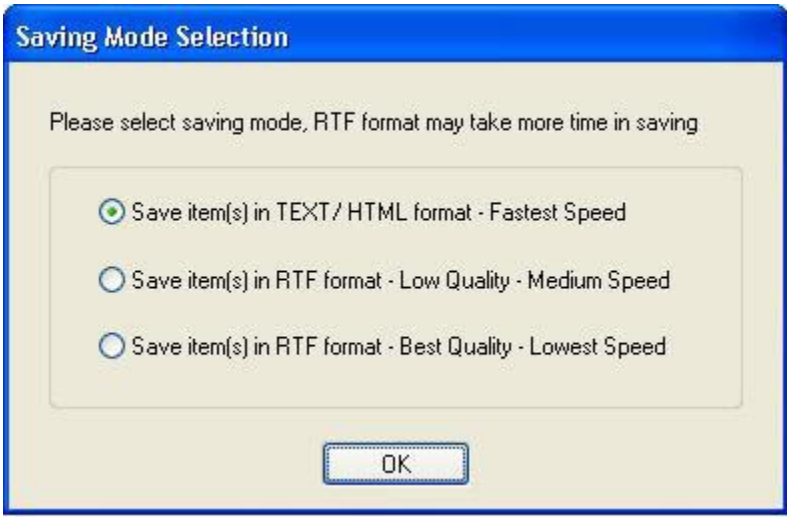
You can Exclude "**All**" folder present in Lotus Notes.

Step 5: After entering the exact details, Click **OK** to continue. Kernel for Lotus Notes to Outlook software will display the following message:

© Lepide Software Private Limited



Click **OK**, Kernel for Lotus Notes to Outlook software displays the **Saving Mode Selection** window:



Saving Mode Selection
Please select saving mode, RTF format may take more time in saving
Save item(s) in TEXT/ HTML format - Fastest Speed
Save item(s) in RTF format - Low Quality - Medium Speed
Save item(s) in RTF format - Best Quality - Lowest Speed
OK

You can choose either of the options from the three and continue with the saving procedure. The conversion process starts:

4.1.2 Convert NSF files to Exchange Server

The **Save in Exchange Server** option lets you access the MS Exchange Server and directly save emails of NSF file in user profiles created on MS Exchange Server, which are then easily accessed by the user from his/her MS Outlook email account.

Step 1: Select the **Save in Exchange Server** option. Click **OK**.

Step 2: Kernel for Lotus Notes to Outlook software will now ask for the Exchange Server details to get connected to the server:

Exchange Server Information
It is recommended to close all instances of Microsoft Outlook while saving file(s)
Prompt to Export each NSF file into different Exchange Mailbox
(Check if you want to export all NSF files into currently enter Exchange Mailbox)
Login Credentials
IP Address :

administrator@www.now.com
Password :
OK

Here, enter Exchange Server IP address or Exchange Server name, Exchange User name with Domain and Password. Click **OK**.

Step 6: Enter the **Date Range** for converting emails between the given date range and click **OK**.

Step 7: Select the **Saving Mode** from the **Saving Mode Selection Window**. Select the desired option and click **OK** to continue.

Step 8: Kernel for Lotus Notes to Outlook software will start the Domino Server files to Exchange Server Conversion process.

After successful conversion, Kernel for Lotus Notes to Outlook software displays the successful conversion message.

Hence, the software converts desired Lotus Notes Domino Server files into Exchange Server and saves at the given location.

©Lepide Software Private Limited

4.1.4 Convert Domino Server files to PST files

The process of saving Domino Server files to PST files by selecting the **Save in PST** option is similar to the **Save in Exchange Server** option. The only difference between these two is their saving location.

With **Save in Exchange Server** option, you need to provide user profile account details created in MS Exchange Server whereas in the Save in PST option you need to provide the saving location for the PST file.

1. Select the **Save in PST** option. Click **OK**.

2. Define the File location and Date Range (Start Date and End Date) to convert files.

3. A window appears asking user to close all instances of MS Outlook (if running). Close all Microsoft Outlook instances if open and click **OK**.

The software displays Saving Mode Selection Window. Select the desired option and click **OK**.

4. Kernel for Lotus Notes to Outlook software will now start the saving process and will display successful message on the completion of saving of the files.

5. When the conversion process completes, software displays the location in which PST file has been saved.

Hence, Kernel for Lotus Notes to Outlook software has successfully completed the Domino files to PST files conversion in Standard Mode.

4.2 Advanced Mode

4.2.1 Use of CSV File in Advanced Mode

In order to work with Advanced Mode, user must create CSV files. CSV file is used to convert several NSF files into PST and Exchange Server in one attempt.

CSV file contains of three columns:

1. File Path

2. Saving Type

3. Saving Location

File Path: In the first column of CSV file, enter NSF file(s) with full path that you want to export in Exchange Server or PST.

Saving Type: In the second column of CSV file, enter Saving type. Type "**ES**" if you want to save NSF file in Exchange Server or type "**PST**" if you want to save NSF File in PST file format.

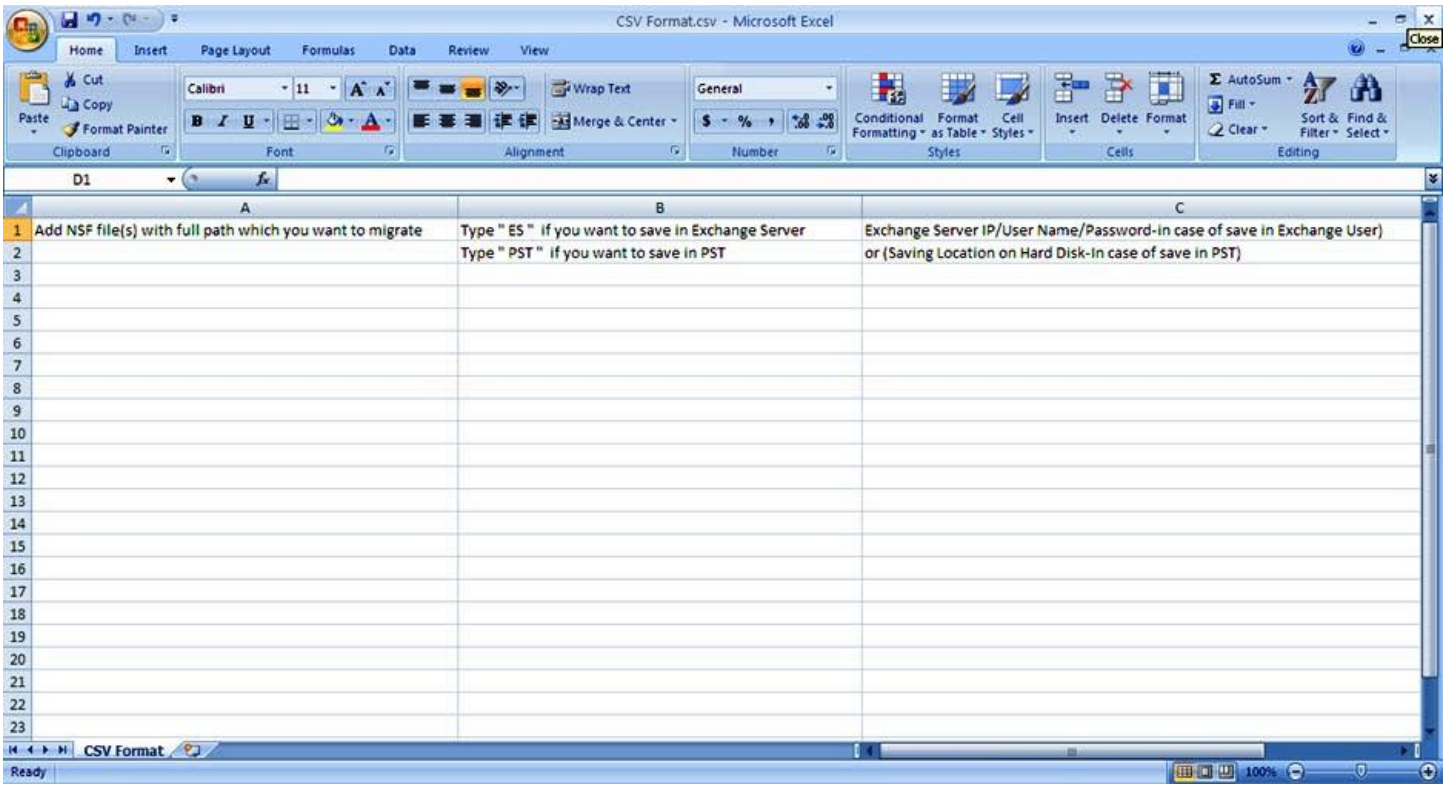
Saving Location: In the third column of CSV file, enter the Saving Location (destination) of exported file. Enter Exchange Server IP address or Exchange Server Name, Exchange User Name with domain and

Password if you want to save NSF file in Exchange Server or enter the Saving Location (destination on Hard Disk) if you want to save NSF file in PST.

> **Note:** Exchange Server IP Address or Exchange Server Name, Exchange User Name with domain, Password is separated by forward slash (/) in case of “Save in Exchange Server”.

For Example: Exchange Server IP Address or Exchange Server Name/Exchange User Name with domain/Password

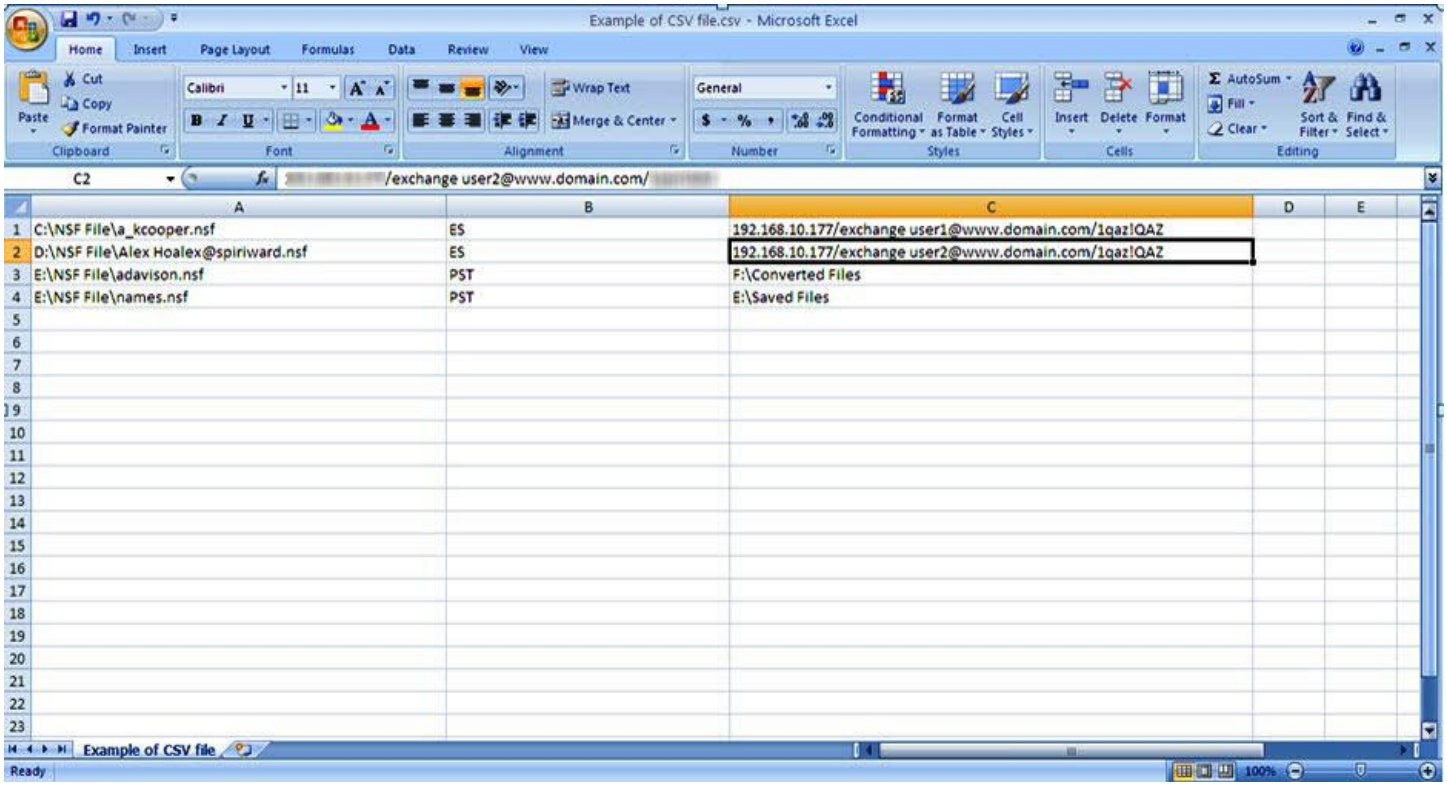
The following screen shows Format of CSV File:



CSV Format.csv - Microsoft Excel
Add NSF file(s) with full path which you want to migrate
Type " ES " if you want to save in Exchange Server
Type " PST " if you want to save in PST
Exchange Server IP/User Name/Password-in case of save in Exchange User)
or (Saving Location on Hard Disk-In case of save in PST)
CSV Format
Ready

The following screen shows Example of CSV File:

© Lepide Software Private Limited



Restrictions of CSV File

There are few restrictions with CSV file:

File Path:

1. The NSF file source path should be entered with utmost precision in CSV file (for example, if NSF file is located in a folder inside C:\ drive then file path should be “C:\Folder Name\file name”)

2. Take care in entering NSF file extension in CSV file (for example, if NSF file name is "abc" then file name should be “abc.nsf”).

Saving Type:

1. Always remember to give valid Saving Type (Type “**PST**” for save in PST or Type “**ES**” for save in Exchange Server).

Saving Location:

Always remember to give valid Saving Location. You can provide saving location in following two ways:

1. **Save in PST:** If you want to save NSF file in PST, then enter valid destination on hard disk drive in third column of CSV file. (For example, if you want to save NSF file in a Folder in D:\ drive then saving location should be “D:\Folder Name”).

2. **Save in Exchange Server:** If you want to save NSF file in Exchange Server then enter valid Exchange Server IP Address or Exchange Server Name, Exchange User Name with domain and password. (For example, if you want to save NSF file to Exchange user that is in a domain then saving location will be “Exchange Server IP address or Exchange Server Name/Exchange User Name with Domain/Password”).

© Lepide Software Private Limited

Working of CSV File:

In Advanced Mode, click on **Browse** button. Here, "**Select NSF file**" dialog will open. Now select valid CSV file from the computer system. When NSF files of entered CSV file are listed then click on **Export** button to convert files into entered Saving Location.

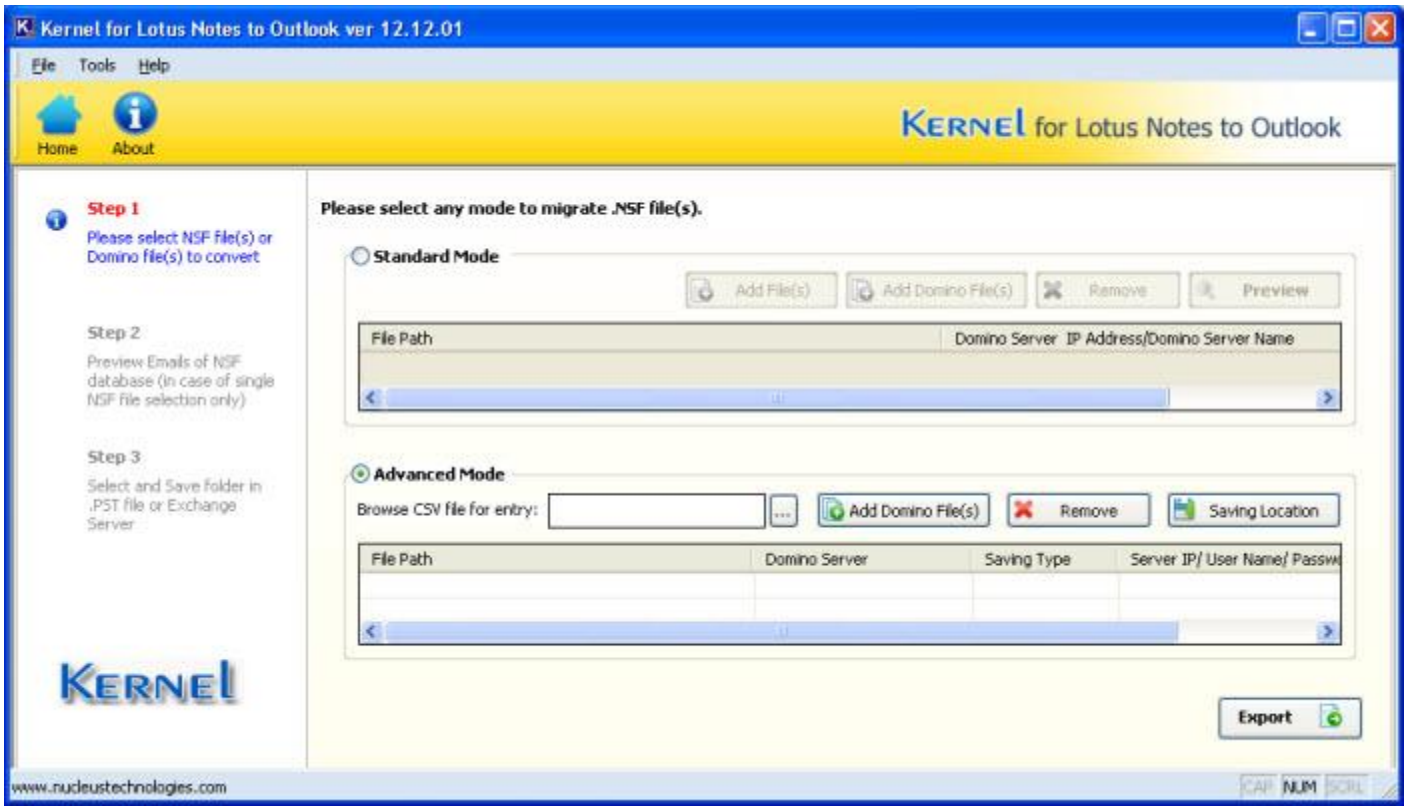
4.2.2 Convert NSF files to PST files

Users can perform the following conversions in Kernel for Lotus Notes to Outlook software under Advanced Mode:

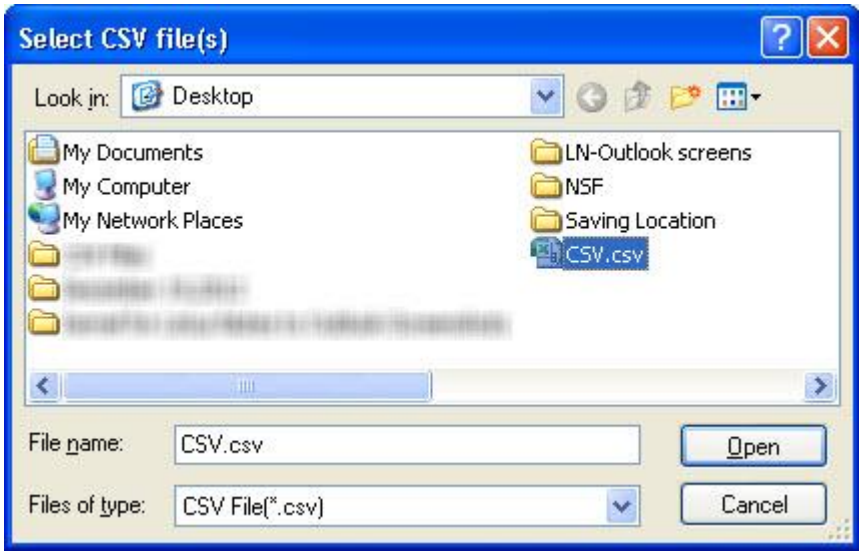
1. Convert NSF files to PST files
2. Convert NSF files to Exchange Server
3. Convert Domino Server files to Exchange Server
4. Convert Domino Server files to PST files

Here, we will see how the Kernel for Lotus Notes to Outlook software performs NSF files to PST file Conversion in Advanced Mode.

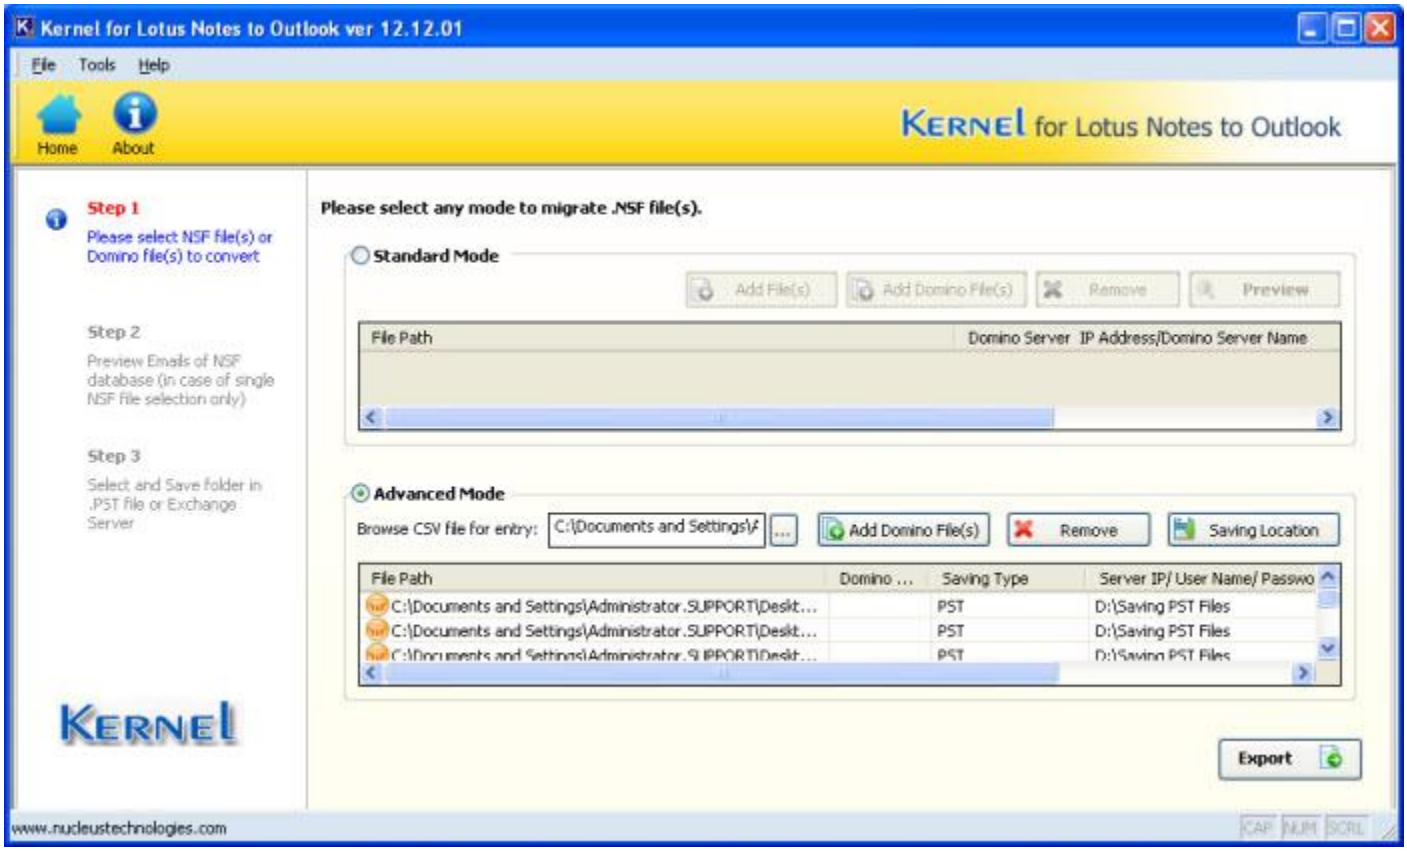
Step 1: Launch Kernel for Lotus Notes to Outlook software and Select **Advanced Mode** in it.



Step 2: Now, create a CSV file containing NSF file name, conversion mode and saving location and Browse CSV file for entry:



In order to give Saving Location, select the Domino Server NSF file(s) from the list and click on Saving Location. Enter PST file location in the box given and Click **OK**. The software then displays the files along with their Saving type and Saving location.



Step 3: Users cannot Preview the file in Advanced Mode. However, users can change or give the saving location before NSF files to PST files conversion.

© Lepide Software Private Limited

Click the **Saving Location** button to change or give new Saving Location. Enter the new Saving location, Start Date and End Date to convert emails within that date range. Click **OK**.

Step 4: When you click **Export** button, Kernel for Lotus Notes to Outlook software asks to close all instances of Microsoft Outlook. Click **OK**.

Kernel for Lotus Notes to Outlook software will display the Saving Mode Selection Window. You can choose either of the options from the three and continue with the saving procedure.

Step 5: The software starts the conversion process.

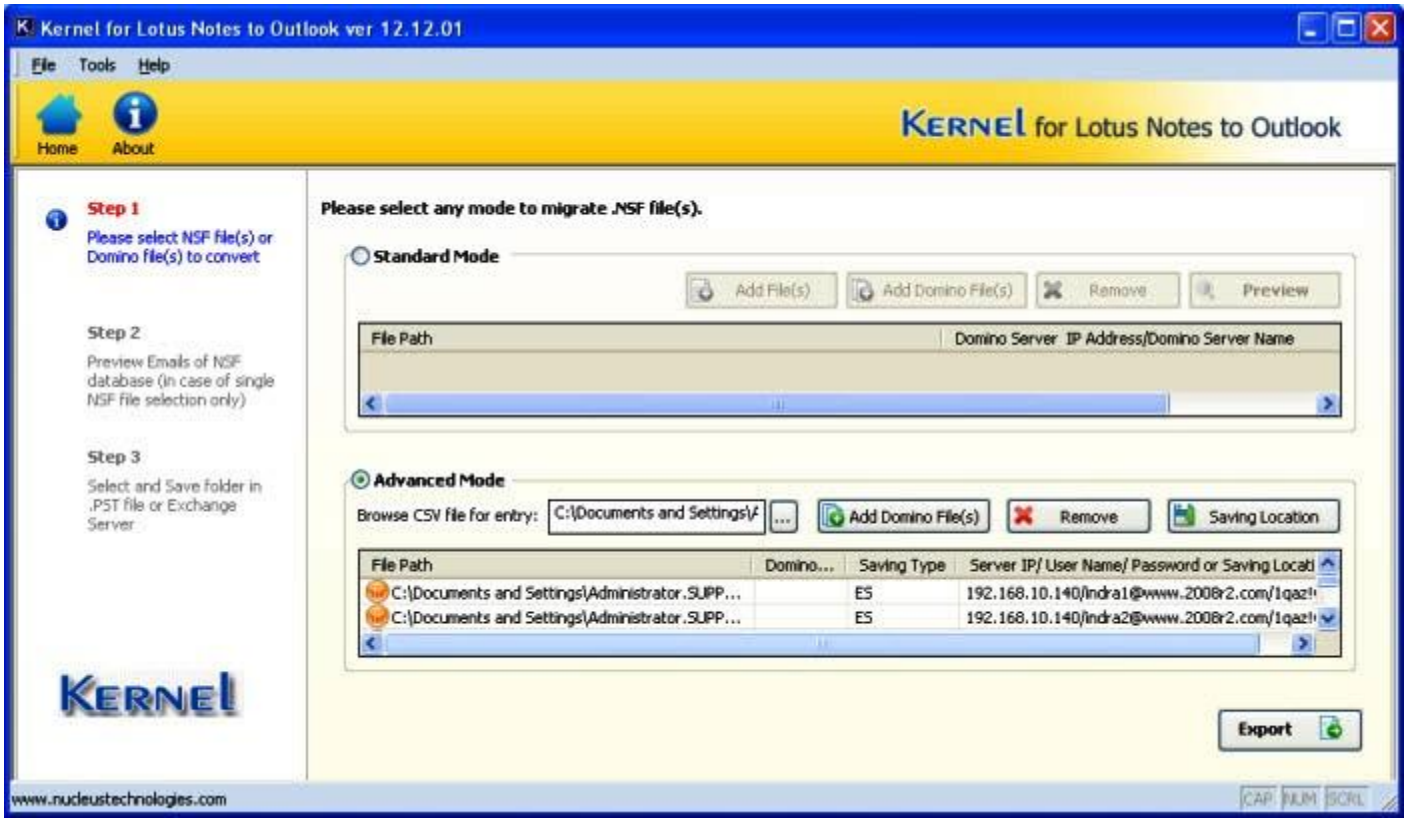
On successful saving of the files, Kernel for Lotus Notes to Outlook software displays the successful saving message.

Hence, entire NSF file get converted to PST file and saved, which now can be viewed with MS Outlook email client.

4.2.3 Convert NSF files to Exchange Server

The **Save in Exchange Server** option lets you access the MS Exchange Server and directly save emails of NSF files in user profiles created on MS Exchange Server, which are then easily accessed by the user from his/her MS Outlook email account. The functions required to Convert NSF files to Exchange Server are similar to the functions required to Convert NSF files to PST files. However, while including NSF files, the user must include Exchange Server details such as Exchange Server IP Address or Exchange Server Name, User Name with Domain and Password in CSV file. The software will then ask for only Date Range and it would not ask user to enter the Exchange Server details again.

Step 1: After selecting Advanced Mode and including CSV file containing Exchange Server Address, the NSF files get listed as below:



The File Name, Saving Type and Exchange Server Address are displayed. Click **Export**.

Step 2: The software displays File Location and Date Range Window. User can only enter the Date Range as Exchange Server Location has already been entered.

Enter the Start Date and Ending Date to convert NSF files within that date range and click **OK**.

The Software asks the user to Close all instances of Microsoft Outlook (if running).

Click **OK** and close all Microsoft Outlook instances.

Step 3: The Software displays Saving Mode Selection Window. Select the mode you wish to and Click **OK**.

Step 4: Kernel for Lotus Notes to Outlook software will start the saving process.

After successful saving, Saving Complete message gets displayed.

Hence, Kernel for Lotus Notes to Outlook has successfully converted NSF files to Exchange Server in Advanced Mode.

4.2.4 Convert Domino Server files to Exchange Server

Step 1: Launch Kernel for Lotus Notes to Outlook software and select **Advanced Mode** in it.

©Lepide Software Private Limited

> **Note:** Domino Server files cannot be added in **CSV** file format. One has to individually select Domino Server files for conversion.

Step 2: Click the **Add Domino File(s)** button.

Kernel for Lotus Notes to Outlook software will display the "**Domino Server File Selection**" window where it will ask you to add the Domino Server Name or IP Address.

Define the Domino Server Name or IP Address in the field or search for the Domino Server in network with the help of **Search Domino Server** button. Kernel for Lotus Notes to Outlook software will search for the Servers if you click the **Search Domino Server** button.

Step 3: As the software gets connected to the Domino Server, it will ask for the password to obtain access to the Server. The screen to enter password would appear irrespective of Mode of Domino Server selection. Enter the password and click **OK**.

The software lists NSF files contained in the Domino Server. Select the appropriate NSF file(s) which have to be converted.

Step 4: Click **Add** button to list the NSF files in the software for conversion. It displays an error message asking if you wish to enter more files or add other Domino Server. Click **Add** else click **Finish** to proceed the conversion.

Step 5: Click the **Export** button to convert the files. As soon as the user clicks **Export**, the software asks the Saving location to be entered.

In order to give Saving Location, select the Domino Server NSF file(s) from the list and click on **Saving Location**. Enter the Exchange Server IP Address or Exchange Server Name, Exchange User Name with Domain and Password. Click **OK**.

The software then lists the NSF files along with their name, conversion mode and Saving location.

Step 6: On clicking **Export**, software asks the user to enter the **Date Range**. Enter the **Date Range** for converting emails between the given date range and click **OK**.

> Note: Ensure that Exchange Server is in working condition while working with this option.

Step 7: A popup message appears saying “It is recommended to close all instances of Microsoft Outlook while saving file(s). Click **OK**.

Kernel for Lotus Notes to Outlook software then displays **Saving Mode Selection** window. Select the desired option and click **OK** to continue.

Step 8: Kernel for Lotus Notes to Outlook software will then perform the Domino Server files to Exchange Server Conversion.

After successful conversion, Kernel for Lotus Notes to Outlook software displays saving completion message.

Hence, Kernel for Lotus Notes to Outlook software has successfully converted Domino Server NSF files into Exchange Server and saved to the desired location.
